How does the contract editing process work?

Richard - 2021-10-28 - [0 Comments](#) - in [Legal Documents](#)

There are two different edit modes for all LawBite contracts. The first is 'Simple Edit' where only certain key fields in the contract text and schedule can be edited (this is the default mode) and the second is 'Full Edit' mode, where you are free to change as much of the text as you want. We recommend trying to use 'Simple Edit' mode where possible as this is the easiest way to control and understand the changes that are made to your contract.
